SG | Network Services, Inc.

Complete Telecom Room Services

Blade Chassis, Rack-and-Stack, MDF/IDF & Datacenter

At SG Network Services, we thrive on turning complexity into capability. Specializing in intricate datacenter and on-site MDF/IDF build-outs, we transform challenges into opportunities, ensuring your back-of-house is not just robust but finely tuned for optimal performance. Elevate your network rooms with SG – where complexity meets expertise.

We work with top-tier OEM's like CommScope, APC, Dell EMC, Eaton, Check Point, SolarWinds, NetApp and HPE. We're also built for IEEE 802.3, ISO/IEC 27001, BICSI 002, ASHRAE 90.4 and various cloud compute platforms. Whether it be rack-and-stack, blade chassis, crimping, ladder rack, enclosures or OOBE, SG has a capability built for your project. We live behind security running raceways, conduit, equipment racks, raised flooring and IDF's in DC's and retailers across all of America!
