Why **SG** Network Services?

FOUNDED BY THOSE WHO LEFT BIG BROTHER TO DO IT BETTER

We are nationwide managers of technology enablement. We understand enterprise build-outs & technology deployment. We're here so you don't have to be in the field logistics business. We have services that span different skillsets, giving you a seamless partnership despite the project or need. We're focused on delivering the simplest, most elegant workflow, in a method you can trust. We are a people-centric organization that cares about how you value us. Every event in-the-field is an opportunity to provide sophistication. Proof is in the experience. We challenge the Status Quo by delivering you what everyone else can't.

We were frustrated
by the red tape of
larger VARs

We knew we could
do better by
prioritizing customer
needs over profits.

We developed the
services people
wanted, even when it
wasn't easy

At SG Network Services, we started by focusing on what people really wanted, even when it was tough or less profitable. This commitment led us to become the best option when quality matters in complex build-outs.

Our journey began with offering specialty labor, quickly evolving into a tiger-team approach that sets us apart. Others struggle to deliver the precision and expertise we provide, but we thrive on it. Our tradesmen are more than just workers—they're professionals who pull permits and serve as onsite GCs because it's their passion, not just a job.

We don't rely on work platforms. Every resource on our team is hand-picked, thoroughly vetted, and fully integrated into SG systems, paperwork, and processes. It's not just a system—it's our way of ensuring excellence in everything we do.

We're #TeamSG. **EXPECTATIONS. Exceeded.**

SG works on all the technologies you have at your facilities.

Audio Video

At **SG** we offer services **you want.**

BELOVED BY RETAILERS, BRANDS, AND END-USER ENTERPRISE

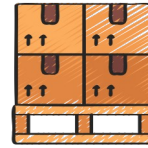

In-Field

We provide survey, assembly, install, cabling, testing, enablement, validation, tuning and a variety of technology services in-field.

At-HQ

SG provides a full suite of project management services along with ancillary engineering capabilities to reduce wasted time in-field.

Add-On

Warehousing, NOC, connectivity, validation, inventory, asset management, and day-2 support are just some of our add-on's.

Specialty Labor

Primary Offering

Tradesmen

Secondary Offering

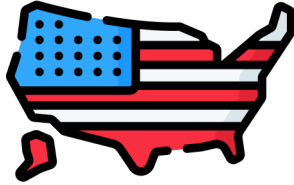

Smarthands

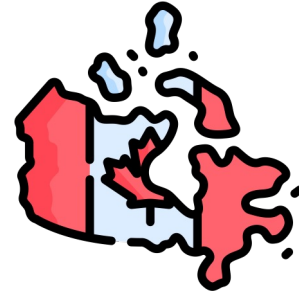

Tertiary Offering

Customers turn to SG when they need specialized teams, expert trades, or a more centralized solution. We start with dedicated, traveling crews—not just a labor platform. Our typical clients are building new locations, rolling out upgrades across a chain, or tackling projects that demand top-tier talent.

SG works when and where **you** need us.
