E-Waste, Recycling & Asset Disposition

Destruction of Data & E-Cycle Processing

Reduce complexity and the need for bonded logistics by having SG wipe HDD in-field, utilizing DoD 5220 standard technologies as well as in-field disablement of sensitive electronics. We have a suite of services designed to connect you with R2-certified processors when the need for recycling or disposition is needed. Don't let decoms stress your teams, when SG has a solution!

In-Field
- Data Destruction
- Shredding
- Disablement
- Firmware Wipe
- Onsite Validation
- De-Install

At-HQ
- PMO
- Logistics
- Field Mgmt
- Documentation
- Recycling
- Certification
- Inventory Release

Add-On
- Warehousing
- Shipping
- Asset Mgmt

We work with LEED & R2 certified processors around the lower 48. We're also built to accept and process electronics at our facilities, reducing the time onsite and allowing you a central office for processing all decom'ed equipment. Whether it's HDD, computerized, chipped, tagged, legacy, or bare boards we've got people in-field with the knowledge to get your data wiped, erased or disabled. Our process and mindset revolves around the environmental impact of decommissioned equipment and integrity of your security. Our services ensure DoD standards and will document data destruction.
